

Build Better, Reduce Costs and Grow Profits

TruFlor was introduced in 2008 to meet or exceed what builders told us they needed and wanted in a sub-floor panel and to provide great value to those builders. TruFlor T&G Sub-Floors have met those expectations and more. TruFlor panels are strong, solid and consistent from panel to panel. They will not delaminate and have no core voids or knots. TruFlor carries the APA grade stamp assuring built-in performance. Look for the stamp on the face of every panel to be sure it's TruFlor. TruFlor can help you meet programs such as LEED® and the National Green Building Standard.

Today there are even more great reasons to specify TruFlor.

TruFlor T&G is produced from fiber that comes from responsibly managed forests. Depending on availability, TruFlor may be available with either FSC® or SFI® Chain of Custody certification. TruFlor is a certified "Green Approved Product" by the NAHB Research Center. Our manufacturing operations are located close to markets. All Norbord OSB brands are "Green Approved Products" and do not contain any added urea-formaldehyde resins.

Certified National Green Building Standard Practices

TruFlor is certified in the following practices

606.1 606.2(1) 606.2(2) 607.1 609.1 901.4(1) 901.4(2-6)

TruFlor may also help you with Resource Efficiency 601.2 601.3 601.4 601.5 and Indigenous Material 608.1

At Norbord we recognize that our environment is fundamental to our existence, and that our businesses and the communities where we operate depend on its health. All Norbord OSB products including TruFlor, can help you meet your 'green' building initiatives.
