

TruFlor[®] SUB-FLOORING

The Start of a Great Build

TruFlor T&G subflooring has been providing exceptional value to builders since 2008.

TruFlor is also available with FSC or SFI CoC

Build Better! Reduce Costs! Grow Profits!

www.TruFlorOSB.com

Builders told us what they needed in a sub-floor panel:

- A quality product to reduce construction costs and shorten cycle times
- A solid warranty
- Wood fiber sourced from renewable forests
- Protection for transportation
- Identification on the panel and the unit to show quality products being used
- Able to withstand minor construction delays
- A cost that provides real value to the builder and homebuyer
- Acceptance by building codes and industry standards

TruFlor meets these expectations!

- TruFlor provides the quality and performance to reduce costs and cycle times
- TruFlor comes with a 25 Year Limited Warranty
- TruFlor is also available with FSC or SFI Chain of Custody
- TruFlor units have stronger packaging for better protection for transportation and storage
- TruFlor panels are face stamped and have a khaki edge color for easy identification by builders and homebuyers to indicate quality products are being used
- TruFlor has a new T&G profile
- TruFlor panels install easily with less wear and tear on tools and equipment
- TruFlor engineered OSB T&G panels utilize a new resin formulation, and a new quality control protocol
- TruFlor is priced to provide builders with the true value required for today's housing market
- TruFlor is an APA grade stamped 4'x8' T&G sub-floor panel

**TruFlor stands out in the standard flooring crowd.
If it doesn't say TruFlor on the panel – it isn't.**

Installation; Please refer to the APA Design/Construction Guide E30U, local building codes, or your engineer/designers requirements.
