

## Announcement

Norbord is pleased to announce we are changing our commodity sub-flooring and sheathing products.

Norbord's **TruFlor** sub-flooring brand was initially launched in 2008 from our mill in Cordele, Georgia. The development of this product was based on input from builders on what they were seeking in a top performing standard sub-floor product. In response to the strong market acceptance of this brand we have migrated this product with the same properties and quality discipline to our other operations. TruFlor is easily recognized by its' bold white cardboard covers, khaki edge color and brand face stamp.

Norbord's **Trubord** sheathing brand is being introduced as a companion product to TruFlor. Trubord uses the same property enhancements and quality controls as TruFlor. A new brand logo and the khaki edge color make Trubord easily recognizable.

TruFlor and Trubord come with a 25 year limited warranty. Production will be available and in the market place by Jan 15, 2010.

These new brands are a reflection of Norbord's ongoing commitment to meet customer expectations in the areas of quality, consistency and service.
