

## Build Better, Reduce Costs and Grow Profits

Trubord rated sheathing has been introduced to meet what builders told us they wanted in a structural sheathing panel. Trubord panels are strong, solid and consistent from panel to panel and are backed with a 25 year warrantee. They will not delaminate and have no core voids or knots. Trubord carries the APA grade stamp assuring built-in performance. Trubord is a companion panel for our TruFlor T&G sub-flooring and can be identified by it's khaki edge color and new logo. Trubord can help you meet programs such as LEED and the National Green Building Standard.

Today there are even more great reasons to specify Trubord.

Trubord is produced from fiber that comes from responsibly managed forests. Depending on availability, Trubord may be available with either FSC or SFI Chain of Custody certification (please specify when ordering). Trubord is a certified "Green Approved Product" by the NAHB Research Center. Our manufacturing operations are located close to markets. All Norbord OSB brand products are Green Approved Products certified, and do not contain any added urea-formaldehyde resins.

### Certified National Green Building Standard Practices

Trubord is Certified for the following practices

606.1 606.2(1) 606.2(2) 607.1 609.1 901.4(1) 901.4(2-6)

Trubord may also help you with Resource Efficiency

601.2 601.3 601.4 601.5 and Indigenous Material 608.1

At Norbord we recognize that our environment is fundamental to our existence, and that our businesses and the communities where we operate depend on its health. All Norbord OSB products including Trubord, can help you meet your 'green' building initiatives.
