

BASIC FACILITY INFORMATION

Company Name: Ainsworth Engineered Canada LP

Contact Information:

Highest Ranking Employee: Jordain Rheault
Site Manager
8074872000
jordain.rheault@ainsworth.ca

Technical Contacts: Chris Walton
Arbora Management Services Inc.
807.620.6094
chris@arbora.ca

Certified Planner: Tony van der Vooren P.Eng, Ph.D, QEP
License Number TSRP0051
Senior Environmental Consultant
AMEC Americas Limited
905-403-3536
tony.vandervooren@amec.com

Parent Company: Ainsworth Engineered Canada LP
100% ownership

Address: 181 Nighswander Road
Barwick, Ontario
P0W1A0

Business Number: 899519573
The facility's NPRI ID: 7170
169 full time employees (equivalent).

Site Location (UTM Coordinates):

The NAICS codes applicable to the facility are:

| | |
|--------|---|
| 32 | – Wood product manufacturing |
| 3212 | – Veneer, plywood and engineered wood product manufacturing |
| 321217 | – Waferboard Mills |

This Toxic Reduction plan was prepared for polymeric diphenylmethane diisocyanate (P-MDI). Separate toxic reduction plans have been prepared for nitrogen oxides, carbon monoxide, particulates (TPM, PM10, and PM2.5), methanol, acetaldehyde, acrolein, formaldehyde, methylenebis(phenylisocyanate) (MDI), cadmium and lead.

9016-87-9 Polymeric diphenylmethane diisocyanate (P-MDI)

TOXIC REDUCTION POLICY STATEMENT OF INTENT

Ainsworth Engineered Canada LP (Ainsworth) is committed to playing a leadership role in protecting the environment. Wherever feasible, we will reduce the use and discharge of polymeric diphenylmethane diisocyanate (P-MDI) in full compliance with all federal and provincial regulations. Our employees are encouraged to participate in all types of toxic substance reduction activities. Toxic substance reduction will be an ongoing effort at Ainsworth, and we will continue to monitor advancements to ensure that options that are both technologically and financially viable are implemented at our facility. No current options were identified that are technically or economically feasible.

REDUCTION OBJECTIVES

There was no reduction option was indentified because Ainsworth is already improving their manufacturing process, on a continuous basis, to reduce their MDI/PMDI resin use. Resins are a costly raw material for the facility. This is achieved through modifying press recipes, dilution (with water) and substitution (better performing resin recipes). Every operation has a performance objective that is evaluated on a yearly basis, to reduce resin consumption. These objectives are built into site performance plans. In addition the MDI/PMDI resins used at Ainsworth are ultimately selected based on their performance characteristics in the final product and customer requirements. There are no feasible resin alternatives that fit both performance and customer requirements.

PLAN SUMMARY STATEMENT

This plan summary accurately reflects the content of the toxic substance reduction plan for P-MDI prepared on behalf of Ainsworth Engineered Canada LP., dated Dec 21, 2013.

DESCRIPTION OF SUBSTANCE

Polymeric diphenylmethane diisocyanate is contained in the isocyanate resin used to create the Oriented Strand Board (OSB) panels. The resin is used as an as adhesive to bond the strands and is contained in the final product.

CERTIFICATION OF HIGHEST RANKING EMPLOYEE

As of December 13, 2013, I, Jordain Rheault, certify that I have read the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents, and to my knowledge the plan is factually accurate and complies with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.

~~101-68-8 Methylenebis(phenylisocyanate) (MDI)~~

9016-87-9 POLYMERIC
diphenylmethane
diisocyanate (P-MDI)

Site Manager
Barwick, On

CERTIFICATION OF LICENSED PLANNER

As of December 13, 2013, I, Tony van der Vooren certify that I am familiar with the processes at the Ainsworth Engineered Canada LP Barwick facility that use or create the toxic substance referred to below, that I agree with the estimates referred to in subparagraphs 7 iii, iv and v of subsection 4 (1) of the Toxics Reduction Act, 2009 that are set out in the plan dated December 13 2013 and that the plan complies with that Act and Ontario Regulation 455/09 (General) made under that Act.

~~101-68-8 Methylenebis(phenylisocyanate) (MDI)~~

9016-87-9 POLYMERIC
diphenylmethane
diisocyanate (P-MDI)
