

ENERGY SAVINGS START WITH THE FRAMING™

Homeowners want lower energy costs, better indoor air quality and improved resale value.

You need solutions that help you meet high wind codes easily while reducing costs and increasing profits.

Like all of Norbord's products, Windstorm will help you meet all those objectives. With so many benefits for you and homebuyer, the decision to make the change is an easy one.

WINDSTORM[®]
Wall Sheathing

A WELL-FRAMED APPROACH TO PROFITABLE ENERGY EFFICIENCY

Changing codes, growth in the economy and housing starts – how's a builder to profit from it all? Well, a bottom-up switch to Norbord is a sound first move.

Norbord understands how overwhelming the residential construction landscape is in 21st century. That's why we've distilled all of that complexity down to one, simple idea, that can start saving you time and energy today:

ENERGY SAVINGS START WITH THE FRAMING™

WINDSTORM[®]
Wall Sheathing

- » **MEET HURRICANE CODE**
- » **REDUCE WALL AIR LEAKAGE UP TO 60%**
- » **ELIMINATE HARDWARE AND BLOCKING**
- » **INCREASE WALL STRENGTH**
- » **LOWER MATERIAL AND LABOR COSTS**

REDUCE AIR-LEAKAGE, LABOR & WASTE, AND SAVE UP TO \$1,000 PER HOME

It's a challenge to break old habits; but when a product offers so many tangible benefits, making the switch to Windstorm is an easy one. A key component of Norbord's Common Sense Solution, using Windstorm Structural Wall Sheathing means you raise your game by building faster, reducing material and labor costs, meeting high wind codes efficiently, and increase your profits.

SEAL THE DEAL

REDUCE WALL AIR-LEAKAGE BY UP TO 60%

Reducing wall air-leakage greatly adds to both the comfort and energy efficiency of a home. Since vertically installed Windstorm panels stretch from floor framing to top plate, all seams land on framing members, making extra horizontal joints a thing of the past, reducing wall air-leakage by up to 60%.

READ THE REPORT @ NORBORD.COM/WINDSTORM

PERFECT FOR A RAISED-HEEL TRUSS

Vertically installed Windstorm panels give you the extra length* you need to build a stronger, more air-tight box, while also taking advantage of a raised-heel truss up to 24" tall. Used together, including high wind zones, you may be able to reduce...bigger savings

MEET CODE THE BETTER WAY

Windstorm eliminates the need for wall uplift hardware, and does away with extra blocking and filler strips. Available in a wide range of panel lengths for a variety of joist depths and wall heights, there's a perfect Windstorm panel for you.

SAVE UP TO \$1,000 PER HOUSE

Along with the substantial time savings it offers, Windstorm will also help you keep more money in your pocket; up to \$1,000 per house, in fact. How? By reducing the material, labour, waste, attic insulation, on each and every home you build.

TESTIMONIAL

“**NARMA STEPANOW, THE PROJECT MANAGER FOR MICHAEL J. WRIGHT CONSTRUCTION CO. INC.** Time was a challenge throughout this project. The wall sheathing made a world of difference. The speed of the job was remarkable.” said Narma Stepanow, the project manager for Michael J. Wright Construction Co. Inc. “The panels not only went up fast, but they also went up the right way quality-wise.”
