

INDUSTRIAL-GRADE PACKAGING PANELS

Norbord has developed, engineered and manufactured panels specifically for the packaging industry. Consultations with the packaging industry revealed their top priorities which included the ability to reduce cutting, minimize handling and reduce waste while maximizing savings.

Norbord's technical team developed a panel specifically for the packaging industry to meet or exceed the packaging industry's priorities.

THE NORBORD SOLUTION – THE INDUSTRIAL-GRADE PACKAGING PANELS:

- Custom panel lengths* are available to reduce cutting, handling and consumption
- Thicknesses available from 7/16" up to 1 1/8"
- The standard size is 4x8
- Special layups and enhanced resin formulations to provide stiffer panels that stay flat
- Speed up assembly with no core voids or panel delamination
- Specific packaging quality protocols to ensure constancy from panel to panel
- Higher internal bond for better holding power for screws, nails, and staples
- Properties that make the panels lighter, easy to work with and provide less wear and tear on tools and equipment

CALL US TODAY

Thickness	Size	Edge
7/16	4x8	Square Edge
19/32	4x8	Square Edge
23/32	4x8	Square Edge
1-1/8	4x8	Square Edge

* availability is based on volume – call for details
