

# INDUSTRIAL-GRADE FURNITURE FRAME PANELS

**Norbord industrial-grade furniture frame panels** are engineered for use in upholstered and motion furniture. Norbord panels allow you to decrease the cost of raw materials for furniture manufacturing without sacrificing product quality.

## FURNITURE FRAME PANELS:

- **Available in 3 grades (FN, HD and HD Plus) to meet different application requirements**
- **Have no knots, core voids or delamination - superior to plywood**
- **Reduce your costs**
- **Are unmarked with no edge seal, grade stamps or marketing stamps**
- **Are CARB exempt**

## FEATURES AND BENEFITS:

**Performance** – Our furniture frame grade panels are a cost effective high performance alternative to plywood.

**Manufactured and Engineered for Strength** – Norbord's panels are manufactured using layers of wood strands aligned in alternating directions and then bonded together with heat and pressure. The resulting panel is smooth, strong and uniform.

**Uninterrupted Supply** – Norbord has manufacturing facilities throughout the U.S. and Canada, ensuring that we will meet your production needs.

**Defect Free and Dimensionally Stable** – Our furniture frame panels have no core voids or knot holes, allowing you to use the entire panel with virtually no waste. They lay flatter than plywood with no warping or cupping.

**CARB Exempt** – Exempt from U.S. HUD and California Air Resource Board (CARB).
